The entire text (Introduction to bibliographical references, including figures and excluding appendices) will not exceed 30 pages (numbered from 1 to 30), including figures.

Remember to add

Cover page (cover)

Summary in English (end cover)

Table of contents

List of abbreviations

Contents:

Particular attention will have to be paid to the adequacy between the analysis strategies employed (technological approaches, data analysis and tools) and the biological problem being evaluated.

Illustrations :

Composite figures as in scientific article.

Captions located under the illustrations in Times New Roman 10 points, single-spaced.

The captions should allow the illustrations to be understood independently of the main text.

Annexes :

The annexes will be exclusively dedicated to the presentation of the codes/scripts developed or modified during the internship, if any. This section will not exceed 10 pages. Be sure to annotate your code to make it easier to read and understand. Any published code used during the course must be cited in the material and method (git hub link, R cran/Bioconductor package, Galaxie, ...) and in the bibliographic references if any.

Submission of reports :

The complete report, in "pdf" format, will be uploaded to Moodle before June 7, 2022 at 12:00 noon, last deadline (the precise site on Moodle will be communicated to you later). The uploaded file will be named according to the format "Name_Firstname_Report.pdf".

Attention: no delay will be tolerated.

Confidentiality agreement:

It is the responsibility of internship supervisors to arrange, within a reasonable period of time, for a confidentiality agreement to be drawn up, if necessary, prior to the date of submission of internship reports. (contact :Carine Joseph : carine.joseph@sorbonne-universite.fr).

Oral defense (/60)

The defenses will take place on the week June 13, 2022. The schedule with the timetables will be sent to you later. A defense is also proposed in September 2022.

The presentation of your report (in French or English) will be based on a Powerpoint slide show.

It should not exceed 12 minutes and will be followed by 12 minutes of discussion.

Particular attention should be paid to the adequacy between the analysis strategies employed (technological approaches, data analysis and tools) and the biological problem being evaluated.
